“ I don't know truly what to say. For him and I only spoke over the phone a few times in my life time. I only know my grandfather for his hearty laugh. I will share my memories.

When I graduated high school I sent him a picture of myself in my cap and gown. When my mother had spoke to him he said I didn't know to which child of mine she belong to but I knew she was part of my family. \*smiles\*

Later in life when I started to attend college. He sent me a gift that would forever change my life. He bought me my very first computer back in 2000. I didn't even ask for it. My heart was truly thankful. He saved me many many ,many long nights of having to stay in the computer lab to complete assignments and projects. So again from my heart to yours Grandfather.

Thank You.

Even up to his very last days of inquiry he would ask if I still have the computer. : \*Laughs\* I am sad to say no I don't have the computer however, I do have the skills. It served it's purpose of education. Something I know you truly believed in.

May your spirit fly with Angels. With Love.

Steva - Daughter of Jan

P.S. and May the Angels bring comfort from the loss of my Grandfather Betty.
